Thermo Scientific[™] TEOM[™] 1405DF Ambient Particulate Monitor

Instrument PM and verification sheet

Instrument serial number	
Instrument location	

Recommended preventat	Recommended preventative maintenance intervals						
Activity	PM interval	Last activity date	Current activity date	Next activity date			
Replace TEOM filter(s):	Filter loading exceeds 75% or every 30 days						
Replace FDMS filter(s):	With every TEOM filter exchange						
Clean PM10 inlet:	With every TEOM filter exchange						
Clean virtual impactor:	With every TEOM filter exchange						
Replace in-line filters:	Every 6 months						
Clean coolers:	Annually						
Clean switching valve:	Annually						
Clean air inlet system:	Annually						
Rebuild vacuum pump:	Annually						
Dryer replacement:	Annually						
Replace mass transducer seals:	Annually						

Recommended instrument verification interval (unless regional requirements dictate otherwise)						
Equipment required:	A NIST-traceable (or equivalent) transfer standard for temperature calibrated for ± 0.5 C precision					
	A NIST-traceable (or equivalent) transfer standard for pressure calibrated for ± 5 mm Hg precision					
	A NIST-traceable (or equivalent) flow transfer standard capable of measuring flow range of .9–19 lpm is required (depending on the flow transfer standard used, a flow inlet adapter may be required)					
Activity	Verification frequency	Last audit date	Current audit date	Next calibration date		
Ambient temperature:	Audit monthly/calibration annually					
Ambient pressure:	Audit monthly/calibration annually					
Bypass flow:	Audit monthly/calibration annually					
PM2.5 flow:	Audit monthly/calibration annually					
Coarse flow:	Audit monthly/calibration annually					
Leak check:	Monthly (or if an audit dictates)					
Analog outputs:	Annually (or if an audit dictates)					
Mass verification:	Annually
